

The PEAC SYSTEM® evaluation will determine potential instincts and with it, potential weaknesses, based on the position expectations. You capitalize in strengths, while you train against weaknesses... if possible. This is scored.

Our CASE Studies© - for sales and recruiting, only- will tell you precisely how this person will handle themselves in a give and take situation, the backbone of the personnel services industry. This is *learned behaviors* in tandem with instinct, above. It can raise or lower the score.

Our Reasoning Aptitude© will indicate how well a person will handle people and information in a give and take environment, such as sales, recruiting, customer service and the like. A measure of the ability to synthesize information on the fly... This can raise or lower scores.

Our Management Consulting (free with each PEAC® Profile, but limited to the profile and process for hiring, training and management of that person) is sustained by well over thirty years of service in the personnel services arena. This gives you that extra step up to have the best chance to make your new individual a success. Affects scores.

Our Online Training© Programs are designed to get new hires, or anyone needing help, up to speed and productive in marketing/recruiting/ or management role in the Personnel Service arena....
